Task and Daily Routines

Intervention Based on Assessment During Activities of Daily Living

The Cognitive Impairment Assessment Protocol (CIAP) was created with funding by the Michigan Department of Community Health.

Much of this content first appeared in 1990 and 1991 in a different format in the following publications.

Weaverdyck, S.E. (1990). Neuropsychological Assessment as a Basis for Intervention in Dementia. Chapter 3 in N. Mace (Ed.) *Dementia Care: Patient, Family, and Community*. Baltimore, Md.: Johns Hopkins University Press.

Weaverdyck, S.E. (1991). Assessment as a Basis for Intervention. Chapter 12 and Intervention to Address Dementia as a Cognitive Disorder. Chapter 13 in D. Coons (Ed.) *Specialized Dementia Care Units*. Baltimore, Md.: Johns Hopkins University Press.

All parts of the CIAP are drafts as of 2/24/10.

Do not reproduce any of these documents without written permission from the author, Shelly Weaverdyck, Ph.D.
